¹ Census tracts are identified by an up to five-digit integer number and may have an optional two-digit suffix (for example 110.01 or 107.01). The census tract number consists of six digits with an implied decimal between the fourth and fifth digit corresponding to the basic census tract number, but with leading zeros and trailing zeros for census tracts without a suffix. The tract number example above would have values of 00200 and 14700, respectively.
² Place label color corresponds to the place label color.
³ Census tracts are identified by an up to five-digit integer number and may have an optional two-digit suffix (for example 110.01 or 107.01). The census tract number consists of six digits with an implied decimal between the fourth and fifth digit corresponding to the basic census tract number, but with leading zeros and trailing zeros for census tracts without a suffix. The tract number example above would have values of 00200 and 14700, respectively.

Note: International, state, county, and/or MCD/CDP boundaries outside the map show the boundary symbol for only the highest ranking of these boundaries. Geographic area names as followed by their FIPS or census code. A " " following an MCD name denotes a value MCD. A " " following a place name indicates that the MCD coincides with the census tract and FIPS code on the place. The label MCD label is not shown.

Note: Some boundaries, some road names, along with other features and geographic names on the map may not be shown.

All legal boundaries and names are as of January 1, 2020. The boundaries shown on this map are for Census Bureau statistical data collection and tabulation purposes only. State, county, and MCD/CDP boundaries for statistical purposes are not considered a determination of jurisdictional authority or rights of ownership or entitlement.
