Military	Blue Area	Other Water	Blue Area
Public or State Park, Forest or Recreation Area	Blue Area	Other Water	Blue Area
Quadrant	Blue Area	Other Water	Blue Area

When international, state, county, and/or MCD/CD boundaries coincide, the map shows the boundary symbol for only the highest ranking of these boundaries. Geographic area names are followed by either their FIPS or census code.

1 A "1" following the MCD census code in a label MCD 1. A "1" following a place name indicates that a MCD coincides with the census tract and FIPS code as the place number 001. A "1" label is not shown.

2 Place label color corresponds to the place label color.

3 Census tracts are identified by an up to four-digit integer number and may have an optional five-digit suffix for example 101 or 101.01. The census tract number consists of an eight with an implied decimal between the fourth and fifth digit corresponding to the basic census tract number, but with leading zeros, and trailing zeros for census tracts without a suffix. The tract number example above would have values of 001001 and 10101.01, respectively.

4 Due to space limitations, some road names, along with other features and geographic names on the map may not be shown.

Consolidated City	□ □ □ □ □		Transit	■	Dark Purple

**LEGEND**

When international, state, county, and/or MCD/CD boundaries coincide, the map shows the boundary symbol for only the highest ranking of these boundaries. Geographic area names are followed by their FIPS or census code.

1. A "U" following an MCD census code in value MG123.A "U" following a place name indicates that the MCD coincides with the census tract. FIPS codes on the phone, including MCD labels, are not shown.

2. Place label color corresponds to the place label color.

3. Census tracts are identified by an up-to-four-digit integer number and may have an optional two-digit suffix (for example 111.01.01). The census tract number consists of an eight-digit integer between the front and back end (0001-9999) corresponding to the basic census tract number, but with leading zeros and trailing zeros for census tracts without a suffix. The tract number example above would have values of 000100 and 147010, respectively.

4. Open spaces, boundaries, some road names, along with other features and geographic names on the map may not be shown.

County Route	Thin Line	County Route	Thin Line
Unimproved Plow	Thin Line	Unimproved Plow	Thin Line
Consolidated Plow	Thin Line	Consolidated Plow	Thin Line
General Tract	Thin Line	General Tract	Thin Line

**LEGEND**

1 A " " following an MCD name denotes a label MCD. A " " following a place name indicates that a label MCD exists with the same name and FIPS code as the place. The label MCD label is not shown.

2 Place label color corresponds to the place label color.

3 Census tracts are identified by an up to four-digit integer number and may have an optional two-digit suffix for example 1-1 or 1-101-2. The census tract index consists of the eight with an implied decimal between the first and fifth digit corresponding to the basic census tract number but with leading zeros and trailing zeros for census tracts without a suffix. The tract number example above would have values of 00000 and 10000, respectively.

4 Due to space limitations, some road names, along with other features and geographic names on the map may not be shown.

Scale: 1 inch = 10 miles

North Arrow
